

THE HORSHAM CHOIR BACK ROW RISER

Horsham Chamber Choir have devised a simple and flexible solution to the problem of allowing the back row to see the Conductor.

It comprises a series of 2 foot, almost square platforms, each mounted on a simple sturdy slotted frame, 8 inches high, which can be joined together in a straight line, or by turning a platform round, into a gentle curve. Greater curves can be achieved by turning two or more platforms round.

This flexibility allows for different configurations to suit different locations.

The platforms are held together with simple Velcro fastenings.

The complete package consists of 12 carpeted platforms (2 x 2 x 2 x 2.2 foot) and 12 frames (each consisting of 4 identical slotted pieces measuring 2 foot by 8 inches).

Maximum linear width of whole staging is 24 feet 7 inches.

It is available for hire at £100, (delivery and collection in Sussex and Surrey £60) or to purchase at £660.
